TECHNICAL PRODUCT MANAGEMENT · PLATFORM ECOSYSTEMS & ARCHITECTURE

tgarrett.92@icloud.com · linkedin.com/in/thomasgarrett-digital · tomg926.github.io/Tom-Garrett-Technical-Product-Management · Dublin, Ireland

Technical product leader with ten years at the intersection of **scalable software architecture**, **UX design** and **platform ownership**. I own the roadmap for a regulated US rental-payments platform serving **250,000+ customers** across three applications, designed the **enterprise API ecosystem** that unlocks its largest accounts, and run data-led discovery to decide what ships. I founded DocuDynamics and took it from **idea to funded MVP in five months**, and I advise early-stage Irish companies on product. I write the code alongside the roadmap, so system constraints become a plan rather than a surprise.

PRODUCT & TECHNICAL SKILLSET

- **Product strategy & delivery** — Agile planning, multi-phase initiative scoping, cross-timezone execution, stakeholder management
- **Discovery & validation** — user research, UX prototyping, Hotjar/session analysis, data-led feature kill/scale decisions
- **Platform & ecosystems** — API contract design, developer experience (DX), feature flags (Flipper), analytics instrumentation
- **Regulated domains** — US FinTech/PropTech, SOC 2 Type I, security and performance as product constraints
- **Core technical fluency** — Ruby on Rails, React, Node, SQL/PostgreSQL, GCP/AWS infrastructure, CI/CD pipelines, system architecture
- **API integrations** — Yardi, Entrata, RealPage, Rent Manager, Twilio, Stripe, Salesforce

EXPERIENCE

DepositCloud

IRELAND (US MARKET)

Multi-tenant Rails SaaS managing the full US rental security-deposit lifecycle for property management companies and multifamily operators.

Technical Product & Engineering Director

Aug 2025 – Present

Lead Technical Product Engineer

Jun 2024 – Aug 2025

- Define and execute the product roadmap across **three applications** serving **250k+ customers** (85k+ active accounts, 160k+ enrollments onboarding), aligning a distributed team of **8 engineers** on daily priority frameworks and release cycles.
- Partnered with company leadership to translate strategic business objectives into **rapid-prototype product mockups**, using production data to validate core user journeys before full rollout.
- Transformed deployment strategy by introducing **feature flags tied to analytics** (Flipper), establishing measurable launch metrics that make every release a strategic product decision rather than a scheduling event.
- Scoped, designed and launched a **Twilio-based communication platform in under three months**, reducing average operational handling time and eliminating **100% of third-party vendor licensing costs**.
- Owned the product lifecycle for a greenfield **PMS Sync & Integration product**, architecting bi-directional APIs with Yardi, Entrata, RealPage and Rent Manager — the integrations that unlock enterprise-tier accounts.
- Sustained a delivery cadence of **900+ merged PRs and 18–25 major multi-phase initiatives over 24 months** through structured Agile planning, weekly one-to-ones and clear initiative scoping.
- Accelerated product release velocity **from two weeks to under four hours** by re-engineering automated CI/CD infrastructure (Docker, GitHub Actions), removing deployment blockers for cross-functional teams.
- Treated security as an essential product requirement, embedding **SOC 2 Type I compliance**, automated penetration testing and vulnerability mitigation directly into the development roadmap.

Product Consultant & Adviser

2024 – PRESENT

Advisory and hands-on product engineering for early-stage Irish companies.

- **Guest Nutrition** (2024 – present) — product adviser to an Enterprise Ireland High Potential Start-Up (HPSU); guided product strategy from **0 to 1** and into active industry field trials.
- **WealthGuard** (2025 – present) — scoped the product specification and built a robust wealth-management application in Ruby on Rails, now in active production use by **100+ high-net-worth clients**.

DocuDynamics — Founder

NOV 2022 – JUN 2024

Compliance-automation startup. End-to-end product development, from customer discovery to production code.

- Designed and launched the entire **v1 web application from concept to funded MVP in five months** (React, Node, AWS), securing **Microsoft for Startups** and **New Frontiers Phase 2** backing.
- Mapped the critical user workflows — **document upload** → **AI pipeline** → **collaboration** — and continuously optimised systemic friction points through direct user discovery sessions.
- Cultivated a culture of disciplined experimentation, using real-time production analytics to **kill low-engagement features** and scale high-value workflows.

- Managed end-to-end delivery of web and mobile software features, aligning qualitative user research with sprint goals to ship production-ready work inside **two-week iterations**.
- Designed a custom **Salesforce CRM integration** strategy that eliminated **60% of manual data entry** and increased operational capacity by **40%**.
- Embedded rapid product validation frameworks by introducing **Hotjar** for user testing, cutting feature evaluation lifecycles by **70%**.
- Featured in **The Sunday Times** (Business, Jul 2020) on leadership in helping Irish SMEs build data-driven operations.

Earlier roles

2016 – 2019

- **Full Stack Developer**, Gambling.com Group, Dublin (Jan – Dec 2019).
- **User Experience Designer**, GRID Finance, Dublin (Jan 2018 – Jan 2019) — journey mapping and application interfaces for an SME lending engine.
- **Multimedia Designer**, Associated Newspapers (Jun 2017 – Jun 2018) · Cauldron Recording Studios (Jun – Sep 2016), Dublin.

SELECTED CASE STUDIES

Written up in full at tomg926.github.io/Tom-Garrett-Technical-Product-Management

Multilingual Contact Centre

VOICE INFRASTRUCTURE · DEC 2024 – JUN 2026

Multilingual browser-based call centre on Twilio Programmable Voice; product and delivery lead across 7 contributors. Language-aware round-robin routing, row-locked so two callers can never be handed the same agent; every call is a two-party conference, so warm transfer, hold and supervisor entry never drop the caller.
~5,000 calls a month · 9 languages in the IVR · 28 webhook and agent-action endpoints · 47 schema migrations against a live product

AI-Assisted Household Wealth Dashboards

PERSONAL WEALTH PLATFORM · OCT 2025 – AUG 2026

Household balance sheet, retirement outlook and protection-gap analysis built for Irish rules — per-pension projection, State Pension from 66, headroom against the Standard Fund Threshold. Goals share one cash pool and resolve in priority order, so the same euro can never fund three goals at once.
22 domain tables · 24 screens, member and adviser · test-suite rebuild from 31.9% to 91.6% line coverage across 1,097 tests

Self-Updating AI Legal Knowledge Base

AI LEGAL INTELLIGENCE · JUN – AUG 2026

A knowledge base of US deposit law that keeps itself current and never writes to itself. Three Claude agents research the live web, adversarially fact-check each other, then emit schema-valid proposals a human reviewer accepts, edits or declines. The final stage is tool-free and schema-bound: fourteen required fields, enums tied to the application's own vocabularies.
3 agents per run · 51 US jurisdictions · 106 seeded articles · 128K streamed output tokens per stage

Human-Gated AI Move-Out Pipeline

WORKFLOW AUTOMATION PROTOTYPE · JUL 2026

A four-stage pipeline that works a move-out end to end, then stops — because the next step moves someone's deposit. Model tiers chosen by what kind of mistake each stage can make. Pointed at a real property-management export, it revealed the data model assumed gross figures where the document supplies an already-netted ledger: the finding that justified building it.
4 agents in the pipeline · 2 model tiers, by cost of error · ~\$0.10 estimated cost per statement

EDUCATION & FURTHER STUDY

- **Professional Academy Diploma, Advanced Artificial Intelligence for Business** — UCD Professional Academy. Jul – Nov 2026, in progress.
- **BA (Hons), Digital Art** — IADT Dún Laoghaire, NFQ Level 8. 2013 – 2017, second-class honours (2.1).
- **New Frontiers, Phase 2** — Enterprise Ireland, TU Dublin. Oct 2022 – Mar 2023.
- **Professional Diploma, Digital Marketing** — Waterford Institute of Technology. 2018 – 2019.

RECOGNITION

- **New Frontiers Phase 2** recipient — TU Dublin.
- **Microsoft for Startups** portfolio — DocuDynamics.
- **The Sunday Times**, Business section, July 2020 — on how Irish SMEs can become data-driven.
