

Tom Garrett

LEAD / PRINCIPAL DEVELOPER · PLATFORM ARCHITECTURE, INTEGRATIONS & AI

tgarrett.92@icloud.com · github.com/TomG926 · linkedin.com/in/thomasgarrett-digital · Dublin, Ireland · NFQ Level 8, Computer Software Engineering (1.1)

PROFESSIONAL SUMMARY

Developer of ten years, currently serving as Director of Engineering. I own the architecture across three applications on a regulated **multi-tenant Rails platform serving 250,000+ customers** and lead eight engineers. Most recently shipped a **real-time telephony platform** on Twilio and Redis, and **two production AI pipelines** on the Anthropic SDK, solo. I design for the failure modes rather than the happy path.

EXPERIENCE

DepositCloud DUBLIN, IRELAND (US MARKET)	Director of Engineering · Jun 2024 – Present – Platform architecture. Own the architecture across three applications supporting 250k+ customers on multi-tenant Rails. 900+ merged PRs and 47 schema migrations against live production over 24 months. – Real-time telephony. Built a Twilio-backed contact centre 0→1, launching production calls within three months and scaling to ~5,000 calls a month. Nine-language IVR with row-locked routing for atomic check-and-claim, and Redis presence alongside PostgreSQL. – Resiliency & webhooks. Developed 28 webhook endpoints made strictly idempotent, with compensation logic on failed conference dials — removing 100% of third-party telephony licensing costs. – Enterprise integrations. Built a bi-directional HubSpot CRM sync and a greenfield PMS Sync product. Engineered API contracts with Yardi, Entrata, RealPage and Rent Manager to unlock enterprise-tier accounts, alongside core integrations for Stripe and Salesforce. – Engineering leadership & DevSecOps. Cut the release cycle from two weeks to under four hours (Docker, GitHub Actions) and drove SOC 2 Type I with automated scanning and penetration testing in CI. Lead eight engineers plus design and operations, setting the standards the team builds to.
Independent Developer DUBLIN, IRELAND	Side Venture / Technical Adviser · 2024 – Present – Built a wealth-management platform solo in Rails 8, currently in production with 100+ active clients. – Implemented TrueLayer open banking and GPT-4o vision extraction into a 22-table data model, rebuilding unit test coverage from 31.9% to 91.6% (1,097 tests). – Act as an active technical adviser to an Enterprise Ireland High Potential Start-Up (HPSU).
DocuDynamics DUBLIN, IRELAND	Founder & Lead Engineer · Nov 2022 – Jun 2024 – Launched a compliance-automation startup, moving from concept to funded MVP in five months solo using React, Node and AWS. Backed by Microsoft for Startups and New Frontiers Phase 2. – Owned the document upload → AI processing → collaboration pipeline, iteratively mitigating friction points derived from 20+ comprehensive user interviews.
Penco DUBLIN, IRELAND	Developer & Digital Operations Manager · Dec 2019 – Nov 2022 – Shipped web and mobile features on a custom mortgage application and appraisal platform in two-week iterations. – Integrated Salesforce to eliminate 60% of manual data entry, boosting operational capacity by 40%.
Earlier Experience DUBLIN, IRELAND	Full Stack & Multimedia Roles · 2016 – 2019 – Gambling.com Group — Full Stack Developer. Built and user-tested a US-market comparison iOS application. – GRID Finance — UX Engineer. Developed frontend systems for an SME lending platform. – Associated Newspapers / Cauldron Studios — Multimedia Developer & Audio Engineer.

TECHNICAL SKILLS

Build stack — Ruby on Rails, JavaScript, React, Node, Hotwire, SQL, Tailwind CSS. **Infrastructure** — PostgreSQL, Redis, Solid Queue, Docker, GitHub Actions, Google Cloud Run, Cloud SQL, AWS. **Systems architecture** — Event-driven integrations, webhook idempotency and replay systems, row-level locking, WebSockets over Redis pub/sub, retry and compensation design, live database migrations. **AI engineering** — Anthropic SDK (structured outputs, tool budgets, streaming, prompt caching, model tiering), GPT-4o vision extraction, human-in-the-loop review gates, Claude Code.

EDUCATION & RECOGNITION

MSc Computer Science (OMSCS) — Georgia Tech, online part-time, in progress · **Advanced AI for Business** — UCD, 2026, in progress · **HDip Computer Software Engineering** — DCU, NFQ Level 8, first-class honours (1.1), 2021 · **Diploma, Digital Marketing** — WIT, 2019 · **BA (Hons) Digital Art** — IADT, 2.1, 2017 · **Awards** — New Frontiers Phase 2, Microsoft for Startups, The Sunday Times (Business, Jul 2020). **Case studies** — tomg926.github.io/Tom-Garrett-Technical-Product-Management
